Project Description:

The Values Workshop will discuss “urban centers” and develop a framework for urban areas that encompass regional sustainability principles. The framework developed from this study, with the help of your provided participation, will be used to assist the City in revising and/or developing new policies and tools that promote urban areas which encourage combined activity of “live, work and play.” Recommendations from the Values Workshop will help provide housing choices for everyone; promote more walkable, bikeable areas with a balance of housing and jobs; and provide safe, reliable and economical transportation choices to decrease household transportation costs, improve air quality, reduce greenhouse gas emissions and promote public health.

Purpose of Workshop:

- Bring the public together to discuss development in Houston,
- Inform targeted public of the Urban Houston Framework planning process,
- Provide an opportunity for community to give opinion

Hosted By:
